

Mature Adult Bed Bug — 0.125"

## Please Remember!

Following the treatment, do not vacuum or mop clean within 6 inches of the baseboard for at least 4 weeks.

It is common to have further activity for 3 – 4 weeks.

Please vacate premise for at least 4 – 6 hours following treatment.

# Preparation for Eliminating Bed Bugs

Bedbugs can be found **anywhere** in your apartment/home, from the bed to the nightstand, between books on a shelf, under the baseboards, in a crack in the wall, to behind wall plates and light switches. Please remember that bedbugs multiply very quickly. The longer you have had the problem, the greater the infestation. The success of any treatment requires a thorough preparation.

### Please follow the details listed below:

#### Empty or Remove:

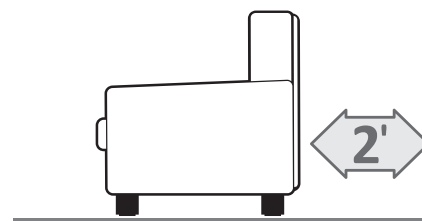

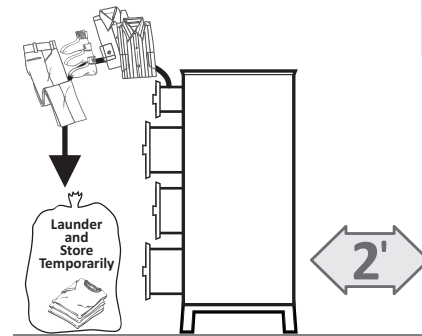

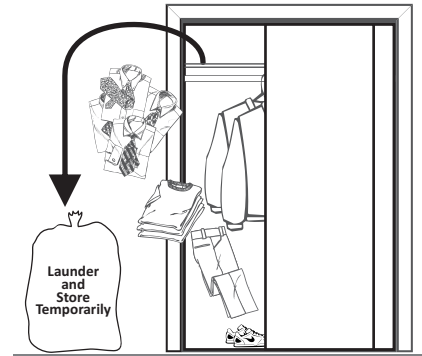

- Remove all bed sheets and launder prior to our arrival
- Empty closets
- Empty and remove all drawers from dressers/night tables and stack together in middle of room or 2 feet away from wall
- Remove all food from cupboards, pots and pans
- Remove all bathroom amenities from vanity

#### Leave in Place:

- Leave mattress on box spring, do not move
- Sofa – leave in place

#### Please Remember:

- Launder all clothing prior to services and store in sealed plastic bags
- Please do not place clothing or other articles on beds or box springs, as they will require treatment
- Pull all furniture 2 feet away from the walls
- Gather all drapes/blinds/etc., and either tie back or leave fully open

#### Note:

It is realized that in some cases bedbugs can inhabit personal effects, such as electronics, books, clothes etc. Please note that **Apex Pest Control cannot be responsible** for handling or treating such items within the home environment. Please assume responsibility to discard or treat these items.

Thank you for your co-operation.
